

Conference on
“Inflation Dynamics in a New Era of Energy Price Shocks”

October 7-8, 2022

Sharply rising labor costs, energy prices and severe supply chain disruptions have driven inflation to a 40-year high. To address the challenges caused by high inflation, American University, Renmin University of China and University of Macedonia will jointly organize the conference on “***Inflation Dynamics in a New Era of Energy Price Shocks***”. The purpose of this conference is to bring together researchers working on various aspects of modelling and evaluation of inflation and its impact on global economy and financial markets. We envisage the conference papers will address the following topics:

- Inflation expectations and energy price shocks
- Drivers of high energy prices and inflation dynamics
- Supply shocks and inflation persistence
- Impact of the renewable energy sources on inflation dynamics
- Climate risks and energy prices
- Monetary policy and low-carbon transition
- Distributional implications of increasing energy prices on inflation

Conference format:

Virtual conference via Zoom, hosted by School of Applied Economics, Renmin University of China. There is no participation fee.

Paper submission procedure:

Please send full papers as a PDF to inflationdynamics@gmail.com. The deadline for paper submissions is **August 31, 2022**. Authors of accepted papers will be informed by September 10, 2022.

Special issue at Energy Economics:

Selected papers from the conference will be considered for an expedited review process for an Energy Economics special issue titled “***Inflation Dynamics in a New Era of Energy Price Shocks***”. The special issue will be edited by Professor Catherine Kyrtsov and Professor Xuguang Simon Sheng.

Organizing committee:

Zidong An, Renmin University of China

Catherine Kyrtsov, University of Macedonia

Xuguang Simon Sheng, American University
